

Frama Matrix F4-L

Frama Matrix F4-L: Intelligence "Made in Switzerland".

- 3000 letters per hour
- 10 cost centres, up to 250
- Up to 5 individual ad slogans
- Ink jet printing 600 dpi
- Letter tray

Demands on franking systems are continuously growing today, and Frama is well aware of this! That is why we are continuously developing trendy innovations that set benchmarks one step ahead of market needs.

The new Frama Matrix F-L exemplifies this with its outstanding user-friendliness, unequalled print quality and customized services.

Frama Matrix F4-L. The new generation.

Plug&Play System

The Frama Matrix F4-L franking machine comes fully configured ready for use. Commissioning, changing inkjet cassettes and administration are child's play with this Plug&Play system.

Fitting scale

By adding a Frama letter-balance to the franking machine Matrix F4-L, you can optimize your post handling even further – with tariff-guided weighing, tariff computing and franking of different letters for maximum speed and dependability.

Simple handling

With our patented user platform ComTouch™ it's easy to handle your daily post.
